**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 lacks antecedent basis for the phrase "said perfluoro compound layer". It is unclear from this phrase whether the bonding piece is the perfluoro compound layer or if some other layer exists from the instant claim as set forth, since it does not appear that it is the perfluorosulfonic acid, perfluorosulfonyl fluoride or alky ester of perfluorocarbonxylic acid since it would be unclear as to how these materials would be placed at that perfluoro compound layer if it is the same layer.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Furuya (EP 1029946).

Furuya disclose a gas diffusion electrode assembly as shown in Figure 8, having two gas diffusion electrodes with a gap therebetween wherein the gap has a fitting and

a resin sheet of a fluororesin such as PTFE, polytetrafluoroethylene/perfluoroalkyl vinylether copolymer and polytrifluorochloroethylen as well as others. See paragraph [0056] The gas diffusion electrodes are in contact with a porous material and a collector sheet and electrode pan (partition). See col 18, paragraphs [0086-0090]. The examiner construes the fitting to be the bond piece and the fluororesin as being the perfluorocompound, which broadly incorporates the materials set forth in the instant claim. Therefore, the prior art of Furuya et al anticipates the applicants instant invention as set forth above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.
